

Dear K member,

we have been living and working in Karlsruhe for quite some time now. We have been asking ourselves some questions and we thought it would be worthwhile articulating, discussing and sharing these with you. To these ends, we are planning an exhibition in combination with a conference. The goal is to draw together paradigmatic, eloquent contemporary artists and thinkers, merging associative and scientific mindsets, in order to create an atmosphere conducive to the emergence of a true and deep perception of relations.

We would like to initiate a dialogue with you and others in preparation for this undertaking. This email represents the initial part of the dialogue. If you are interested in taking part in the conversation, you will receive the second part by responding to this email. Attached you will find a tree diagram, which shows the possible consequences of your decision.

Best,
Angela and Matthias
